## Our Clients

At RedMane, we know that when it comes to developing specialized business software, building the system is only part of the job. The bigger, more important part is client service—taking a partnership approach and involving the client at every stage of the development life cycle to ensure that the software meets its business goals.

We pride ourselves in delivering top-grade service, and we measure our performance against the highest of standards—the complete satisfaction of our clients.

RedMane clients are involved in industries that span the spectrum from governmental health and human services to higher education and insurance. But regardless of business sector, they all share one thing in common—a deep satisfaction with RedMane client service and results.

Here are just a few members of this satisfied club.
